Truck Scale Module

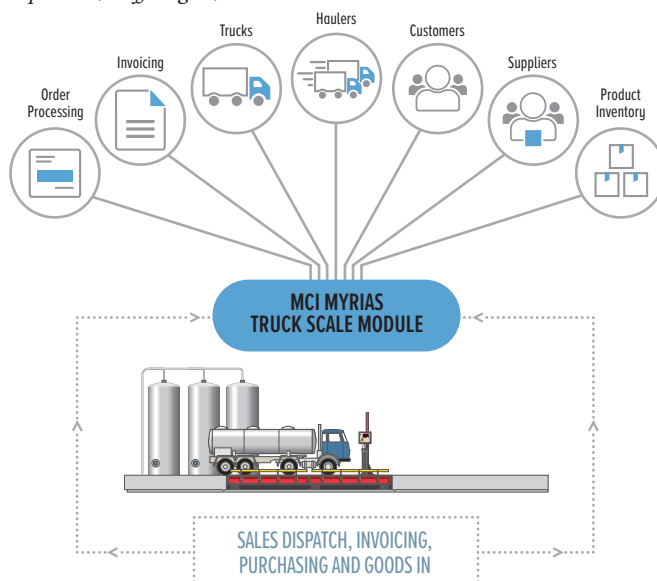

THE MCI TRUCK SCALE MODULE MAXIMIZES VEHICLE THROUGHPUT.

The truck scale module integrates with weighbridges to manage product inventory, haulers, suppliers, customers, order processing, dispatch and invoicing. Vehicle loads can be quickly analyzed for value and traceability.

Record weights on arrival, departure, collecting vehicle and driver ID reporting and traceability on loads. In addition to providing data on camera, barriers, printer and other peripheral devices.

Myrias captures, monitors and reports weight data empowering enhanced decisions by incorporating scale data.

- Records load data and empty vehicle weight
- Loading bay control and content inventory
- Captures vehicle and trailer identifiers
- Multi-axle weighing
- Compatible with a wide range of weighbridge indicators
- Connects to printers, traffic lights, barriers and video cameras
